SUMMARY

As a MERN Stack Developer, I developed and maintained dynamic web applications using MongoDB, Express.js, React, and Node.js. I worked closely with cross-functional teams, including designers and product managers, to design, implement, and optimize new features, ensuring high performance and responsiveness of applications. My responsibilities included troubleshooting, debugging, and upgrading existing systems, writing clean, modular, and well-documented code, and using version control systems such as Git for efficient code management. I have experience with RESTful APIs, front-end development, back-end integration, and adhering to best practices in web development.

EXPERIENCE

Frontend Developer Intern   Jun '23 — Dec '23
Brandora   Kohat, Pakistan
- Acquired hands-onexperience inHTML,CSS, Bootstrap, andJavaScript.
- Implemented responsive design principlestoensure compatibility across various devices andscreensizes.
- Developed proficiency inReact.jsframework throughpractical application andguided learning.
- Executed multiplepractice projects, demonstrating skillsinfrontend development andproblem-solving.
- Thrived ina collaborative internenvironment, contributing toteam projects andenhancing communication skills..

BackendDeveloper Intern   Jan '24 — Jun '24
Brandora   kohat, Pakistan
- Gained foundational knowledge in backend development,focusing on server-side technologies and databases.
- Familiarized with backend language such as Node.js for building robust server-side applications.
- Acquired skills in database management, includingCRUD operations and database integration with web applications.
- Utilized version control systems like Git to manage codebase, track changes, and collaborate effectively with team members.
- Developed Restful APIs to facilitate communication between frontend and backend systems, enhancing overall application functionality.
- Integrated frontend and backend components to create full-stack applications, demonstrating end-to-end development capabilities.
- Demonstrated ability to troubleshoot and debug backend issues, ensuring smooth functionality and performance optimization of web applications.

PROJECTS

Guess the Number Link
- Designed and developed an interactive number guessing game using React.js, showcasing proficiency in state management and component-based architecture.

Bankist App Link
- Implemented a banking application with features like account management, transaction history, and balance tracking, demonstrating skills in frontend design and backend integration.

Login System Link
- Incorporating JWT for enhanced security. Implemented encryption techniques and user authentication mechanisms to ensure user privacy and data integrity.

Portfolio Project Link
- Integrated all projects into a comprehensive portfolio, showcasing frontend and backend development skills, project management abilities, and a diverse range of technologies and frameworks.

SKILLS

Programming Languages   JavaScript, dart, c++
Libraries/Frameworks   Bootstrap, ReactJS, Node.JS, ExpressJs
Database   MongoDB, Firebase, MySQL
Platforms   Heroku, vercel

EDUCATION

BS in Computer Science, Kohat University of science and Technology (GPA: 3.55/4)   Sep '22 — Dec '26
                                                                                                                                     Kohat, Pakistan
- I am currently pursuing a Bachelor of Science in Computer Science (BSCS). My education encompasses a broad range of subjects within the field, including programming, data structures, algorithms, software development, database management, and computer networks. This program equips me with both theoretical knowledge and practical skills in computing, preparing me for a dynamic and evolving career in technology.
